

PUBLIC WORKSHOP #3

FOR IMMEDIATE MEDIA RELEASE: April 22, 2014

Public Workshop on Land Use Study around Joint Base San Antonio-Randolph AFB

The public is invited to participate in an interactive workshop in support of developing the Joint Base San Antonio-Randolph (JBSA-R) Joint Land Use Study (JLUS).

The JLUS is a cooperative planning effort between JBSA-R and the surrounding communities. The objective of the study is to develop a set of recommendations that will promote well-suited community growth and economic development compatible with military training and operations being conducted at JBSA-Randolph, JBSA-Seguin Auxiliary Airfield, and Stinson Municipal Airport.

If you have missed the first two workshops, do not be discouraged to attend this workshop. The purpose of the third public workshop is to provide a presentation of the impacts associated with the JBSA-R missions on the communities surrounding each airfield and the communities' impact on the JBSA-R missions. Maps illustrating where these impacts exist will be discussed and the public will have the opportunity to ask questions and provide feedback.

There will be four public workshops held throughout the JLUS process; this is the third in the series.

The third public workshop will be held on:

Date: **Thursday, May 8, 2014**
Time: **6 pm**
Location: **Olympia Hills Golf & Event Center
12900 Mount Olympus
Universal City, TX 78148**

The public is encouraged to attend this workshop. It is critical to obtain input from the community in order to develop a plan that is responsive to local needs. Please join us to hear about the JLUS and provide your input on local land use issues relevant to the JLUS.
